Knovel University Challenge -- A Fast & Furious Start

Week 1 Recap

This week's winner!

Morteza Chehel Amirani
University of Alberta

Week 1 Recap:

- **A Fast & Furious Start** - University of Alberta became the first school to break 100 participants
- **Most Improved** - The Cooper Union went from 2 participants in 2012 to 39 students this year (and counting)
  - "The Knovel University Challenge is a great way to promote Knovel on campus, especially for our incoming Engineering students. I like the new Leaderboard display, showing the participation numbers for both this year and the previous year. The students and I can easily see our increased participation compared to last year, as well as where we stand compared to the other schools."
    -- Julie Castelluzzo, Electronic Services Librarian at The Cooper Union

What is it: Every year, the [Knovel University Challenge](#) allows students to compete for prizes while learning how to use the research tools they'll need to complete assignments and ultimately succeed in the workplace. Student answer a series of questions on STEM-related topics like finding "the density of ASTM grade 12 titanium alloy". This year the Challenge will begin on September 9, 2013 and end on December 1, 2013.
