ProQuest DNSA- New Collection Added to the TAMU Comprehensive!

I’m excited to notify you that Proquest has added a new collection to the Digital National Security Archives. The CIA Covert Operations: From Carter to Obama, 1977-2010 (collection 40) has been added to the Texas A&M Comprehensive account.

This National Security Archive document set represents the initial release of what will be an even broader collection focused on covert operations of the Central Intelligence Agency throughout its history. This set of records covers management and control of covert operations, as well as activities carried out during the Carter, Reagan, Bush (I), Clinton, Bush (II) and Obama presidencies. (Upcoming installments will encompass earlier periods of the agency’s operations – specifically taking advantage of pending Freedom of Information Act requests that will be fulfilled in the near future.) Containing 2,337 documents, this publication brings together declassified documents and other materials, including key congressional records (necessary for understanding the scope and context of CIA activities) to offer unprecedented detail on a vital but poorly represented aspect of United States foreign activity.
