How to teach RefWorks 2.0 in 15 Minutes

While the ideal way to teach users the basic features of RefWorks is to conduct a 30---45 minute training session, we realize that you may have only a few minutes to demonstrate the power of RefWorks. During this 30-minute session, you'll rapidly learn: how to create an account; direct export citations from two databases; create a folder; create a bibliography from a list of citations; and create a bibliography using Write N’ Cite. This session is primarily designed for those who will train on RefWorks and to learn how to do so quickly; however, those who are new to RefWorks can learn the basics in this 30-minute session.

RefShare 2.0
This 60-minute session covers how to share your database or a folder of references, how to turn your shared folder or database into an RSS feed, how to view, search, print and export references from a shared folder or database and how to access and view a shared folder or database from a central web page. Attendees should have a basic knowledge of RefWorks functionality.

Beyond Direct Export: Five Other Ways to Import Information to RefWorks (40 minutes)
Direct export is but one method for adding references; In this webinar we will review these other methods, which are: Importing from a text file; searching online catalogs or databases from within RefWorks; using a web browser tool called RefGrab-It to capture references from a web page; importing records from RSS feeds; entering references manually.

Using RefWorks to Quickly Import Citations and Write a Paper (30 minutes)
In this session, you'll learn how to directly import citations from two online databases. Then you'll see how to quickly create a bibliography for a paper two ways: 1) from a list or folder of citations in your RW account and 2) with in-text citations via the one line/cite view method. This session is primarily for undergraduates or beginning RefWorks users.
